

ABSTRACT**NEW AGRICULTURAL USE PRODUCT OBTAINED FROM VINASSES AND
SLUDGE OF DISTILLERIES**

5 The present invention provides a product for agricultural use in the
form of granules or pellets, characterised by comprising at least 4% (w/w) of
vinasses and/or sludge measured as a dry extract of vinasses and/or sludge,
and an organic or inorganic solid support. In addition, the present invention
provides a procedure for producing said product, its use in agriculture and a
10 method for applying said product to an agricultural extension to be treated.
